## europa world

*Spectroscopy since 1975*

*Spectroscopy Europe* and *Spectroscopy World* have, under various titles, been publishing free information on all areas of spectroscopy since 1975. Having moved to purely digital publication in 2021, they provide continually updated news of developments in the field, new products, applications and meetings on [spectroscopyeurope.com](https://spectroscopyeurope.com), as well as eight curated digital issues each year.

Discover the wealth of information freely available at [spectroscopyeurope.com](https://spectroscopyeurope.com), and register to receive regular updates and full access to all areas of the website.

### Recent imaging articles

- A new method for MSI visualisation
- LIBS optimised for analysis of nuclear reactor materials
- NIR-HSI can identify hidden gastrointestinal tumours
- IR synchrotron radiation offers better diagnosis for brain cancer
- Better detection of cancerous cells with multimodal imaging
- Mass spectrometry imaging to diagnose brain diseases
- Skin ageing with Raman and MS imaging
- Hyperspectral mid-infrared ellipsometric measurements in the twinkling of an eye
